

- Benchmarks: MoeaBench has implementations of several benchmark problems. Click on the link for the respective benchmark problem of each experiment to obtain more information about the problem. ...
 - DTLZ1:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ1(args)`
 - [DTLZ1](#) detailed information about the problem ...
 - DTLZ2:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ2(args)`
 - [DTLZ2](#) detailed information about the problem ...
 - DTLZ3:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ3(args)`
 - [DTLZ3](#) detailed information about the problem ...
 - DTLZ4:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ4(args)`
 - [DTLZ4](#) detailed information about the problem ...
 - DTLZ5:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ5(args)`
 - [DTLZ5](#) detailed information about the problem ...
 - DTLZ6:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ6(args)`
 - [DTLZ6](#) detailed information about the problem ...
 - DTLZ7:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ7(args)`
 - [DTLZ7](#) detailed information about the problem ...
 - DTLZ8:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ8(args)`
 - [DTLZ8](#) detailed information about the problem ...
 - DTLZ9:
 - `sinxtase: experiment.problem = moeabench.benchmark.DTLZ9(args)`
 - [DTLZ9](#) detailed information about the problem ...
 - DPF1:
 - `sinxtase: experiment.problem = moeabench.benchmark.DPF1(args)`
 - [DPF1](#) detailed information about the problem ...
 - DPF2:
 - `sinxtase: experiment.problem = moeabench.benchmark.DPF2(args)`
 - [DPF2](#) detailed information about the problem ...
 - DPF3:
 - `sinxtase: experiment.problem = moeabench.benchmark.DPF3(args)`
 - [DPF3](#) detailed information about the problem ...
 - DPF4:
 - `sinxtase: experiment.problem = moeabench.benchmark.DPF4(args)`
 - [DPF4](#) detailed information about the problem ...
 - DPF5:
 - `sinxtase: experiment.problem = moeabench.benchmark.DPF5(args)`
 - [DPF5](#) detailed information about the problem ...
 - `my_new_benchmark`:

- sinxtase: `experiment.problem = experiment.benchmark.my_new_benchmark()`
- [my_new_benchmark](#) information about the method
